

The [Speck-lab](#) has two open **Postdoc** positions

- 1.) Biochemistry and/or Structural Biology
- 2.) Genomics

As part of a [CRUK funded project](#), we aim to uncover how human DNA replication origins are chosen, how this process is regulated and how misregulation of these reactions contribute to tumorigenesis and cancer.

Our work is based on exciting preliminary data, that provide a solid foundation to answer these major research questions.

The team benefits from a fun, collegial and encouraging research atmosphere. We value scientific discussions, a passion for research and curious minds.

Imperial College London offers an international environment and the institute has outstanding local facilities.

The 3-year research positions are advertised here: [Nature careers](#)

We encourage candidates to get in touch with Professor Christian Speck (chris.speck@imperial.ac.uk)

Application deadline is: **January 16, 2022**
