

We are hiring **two postdocs** (CNRS & Servier laboratories funding, 2 years).

Candidates should have good knowledge and possibly expertise in **RNA Biology**, as well as expertise or strong knowledge in **biophysics** and/or **structural biology** (NMR, X-ray crystallography, possibly cryoEM). Our projects are related to non-coding RNAs involved in cancers, neurodegenerative diseases or emerging RNA viruses.

Our group « Structure & Dynamics of Molecular Machines » is made up of 6 CNRS & INSERM scientists + 3 CNRS IR engineers, with complementary skills in molecular biology, biochemistry, biophysics, X-ray crystallography, NMR, cryoEM, Molecular Dynamics.

Place: Institut de Biologie Moléculaire et Cellulaire, Strasbourg (France)

Lab "Architecture et Réactivité de l'ARN"

contact: Eric Ennifar (e.ennifar@unistra.fr)
